

## Customer Testimonial

**10th June 2010**

To whom it may concern

SUBJECT: Restoration/building works at Park Street

Melpro Developments recently completed a job for us at the above mentioned property. The works included the removal of an old verandah and façade cladding at the front of the property, and complete restoration of the front façade including weatherboards, two double hung windows, and a new inter-war style gabled verandah.

The whole process from quote to completion was painless. Given it was a relatively small job we at no time felt that our works were compromised due to other jobs being given priority. At all times throughout the process Tim Patterson made himself available by phone and email to resolve any queries. The job was completed sooner and in less time than expected and to budget (excluding our minor mid-works revisions).

The on-site tradesmen were at all times polite and amenable. We were kept well-informed as to when they would arrive, how long they would be onsite and what work they would be undertaking.

We have no hesitation recommending Melpro Developments for any building or renovation works you may be considering.

If you wish to call with any questions please do not hesitate to contact Justin Groves on XXXX XXX XXX.

Kind regards

Justin Groves & Meredith Wells
